

What a Plant Needs and Makes — Picture Sort

Name: _____

To the adult helping: Cut out the 5 picture cards below. Show one card, say its name out loud, and ask the student to place it on the correct mat. The student can place the card, point to the mat, or you can guide their hand — any of these is fine.

TEACHER NOTE — MODIFIED OUTCOME

Student sorts pictures of what a plant needs to make food and what a plant makes, with increasing independence. Confirmed with IPP team. The words "sunlight," "water," "air," "food," and "oxygen" are said aloud during the activity as exposure — they are not assessed.

GOES IN

COMES OUT

Picture cards — cut apart

Say the name as you hand over each card.

sunlight

water

air

food

oxygen

TASK STEPS (TEACHER SCRIPT) — USE THE LEAST HELP FIRST, ADD MORE ONLY IF NEEDED

Step	What the student does	Prompt level
1	Look at the picture card	Independent → point to picture → "Look here" + point
2	Decide which mat it belongs on	Independent → "Does the plant need this, or make this?" → point to correct mat
3	Place the card on the mat	Independent → gesture toward mat → guide hand
4	Repeat for each card	Same sequence; prompts fade as steps repeat

I could sort the pictures:

By myself

With a little help

With a lot of help
