

What a Plant Needs and Makes — Circle It

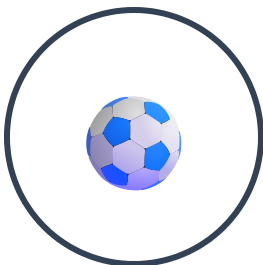

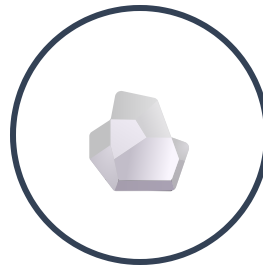

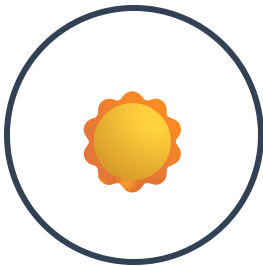

Name: _____

To the adult helping: Read each line out loud. Say the name of every picture in the row before asking the student to circle. The student can circle with a pencil, point, or tell you which ones — any of these is fine.

TEACHER NOTE — MODIFIED OUTCOME

Student identifies which pictures show what a plant needs and what a plant makes, with increasing independence. Confirmed with IPP team. Distractor pictures (not plant-related) check real recognition, not just position.

Circle the pictures a PLANT NEEDS to make food.

Circle the pictures of what a PLANT MAKES.
