

Plant Hunt: Find, Draw, and Label 3 Plants

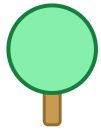

Name: _____ Date: _____

To the adult helping: Read every part of this page aloud with the student, including the word banks. The student can say an answer, point to it, circle it, or write it. Any of these is fine. The drawings only need to be clear, not neat.

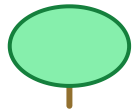

I can find the root system and shoot system of a plant. I can show where the plant makes its food.

Your job Find 3 plants

You will go outside. You will find 3 plants. You will draw each plant.

1. A tree

2. A bush

3. Grass

WORD TO KNOW

Shoot system: the parts of a plant **above** the ground.

WORD TO KNOW

Root system: the parts of a plant **below** the ground.

REMEMBER

You cannot see roots. They are under the ground. Draw the roots you **think** are there.

Rules Outside rules

Stay inside the area your teacher shows you.

Look at plants. Do not pick or pull them.

Do not eat any plant.

Bring a pencil and a green pencil crayon.

Read

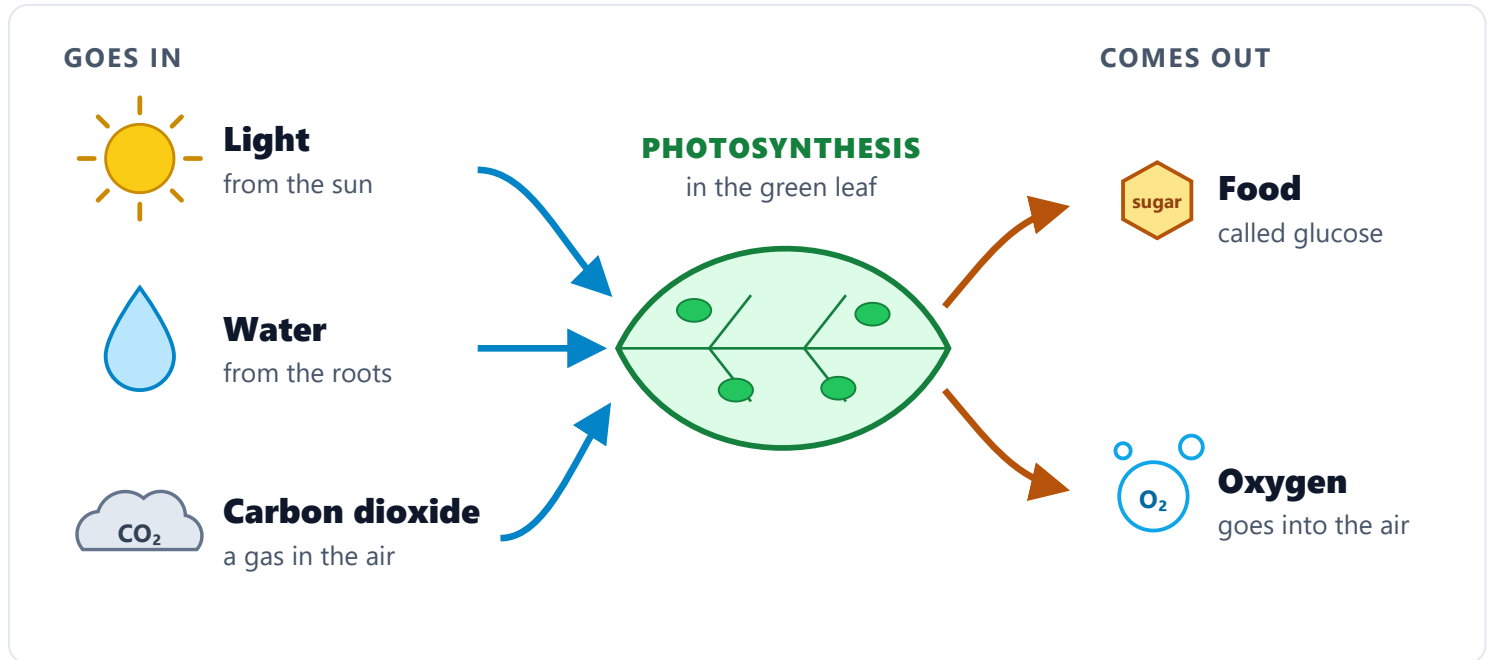

How a plant makes food

A plant makes its own food. This is called **photosynthesis**. It happens in the green leaves.

The leaf takes in light, water, and carbon dioxide. The leaf makes food and oxygen.

WORD TO KNOW

Photosynthesis: how a plant makes its own food.

light + water + carbon dioxide → food (glucose) + oxygen

Where does a plant make its food? (circle one)

roots

soil

leaves

WATCH OUT

Many people think plants get food from soil. Plants make their own food in their leaves.

Look What your drawing will look like

This is a dandelion. Your 3 drawings will look like this. Follow the 3 steps.

1 Draw the plant.
Draw roots under the line.

2 Label the parts.
Use the word bank.

3 Colour the leaves green.
Draw a sun ☀️.

WORD BANK

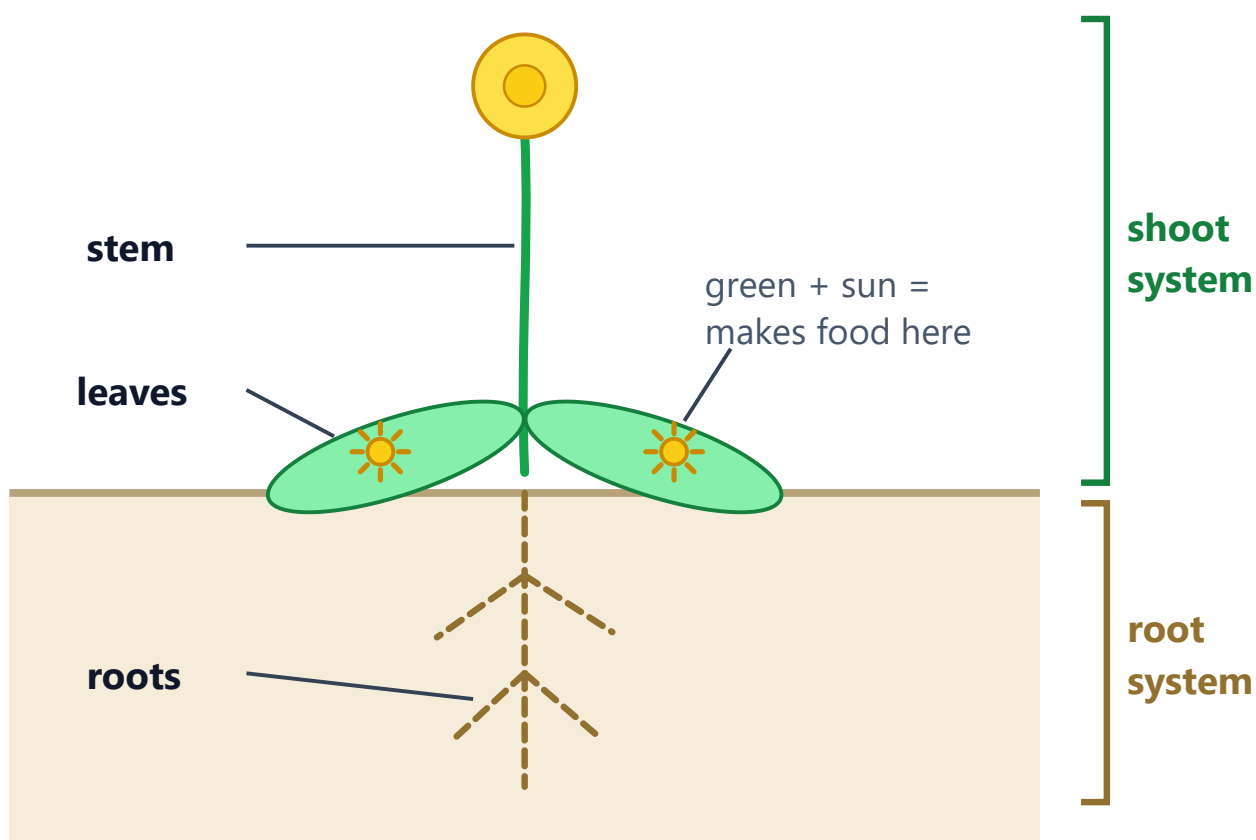

↑ **shoot system** (above ground)

↓ **root system** (below ground)

🌿 **leaves**

🌱 **stem**

🌱 **roots**

Plant 1: A Tree

Draw the whole tree. Make it fit in the box.

1 Draw it

2 Label it

3 Green + sun 

▲ shoot system

▼ root system

↑ shoot system

↓ root system

 leaves

 stem (trunk)

 roots

Where does the tree make its food? (circle one)

roots

trunk

leaves

How do you know?

Plant 2: A Bush

A bush has many small stems. Look near the ground.

1 Draw it

2 Label it

3 Green + sun 

▲ shoot system

▼ root system

↑ shoot system

↓ root system

 leaves

 stems

 roots

The stems are above the ground. Which system are they part of? (circle one)

shoot system

root system

How do you know?

Plant 3: Grass

Draw 2 or 3 pieces of grass. Draw them big.

1 Draw it

2 Label it

3 Green + sun 

▲ shoot system

▼ root system

↑ shoot system

↓ root system

 leaves (blades)

 roots

Grass leaves are called blades. Where does grass make its food? (circle one)

roots

blades

soil

How do you know?

Sort it Which system?

Write each word in the right column.

WORD BANK

 leaves

 stem

 roots

 trunk

▲ Shoot system (above ground)

▼ Root system (below ground)

REMEMBER

Leaves make food. Roots take in water.

WATCH OUT

Plants do not eat soil. Soil gives plants water. Plants make their own food.

CHECK YOURSELF

Does a plant get its food from soil? Say yes or no. Then say why.

Think All 3 plants

A tree, a bush, and grass look different. They all make food the same way.

All 3 plants make food in their (circle one)

green leaves

roots

soil
